Beauty that protects the planet

From supporting indigenous communities who harvest our premium ingredients, to using World Land Trust Carbon Balanced card product packaging, we act sustainably and ethically, to protect this beautiful planet for all.

Why use certified organic skincare?

We are pioneers in certified organic health and beauty, having been certified by the UK Soil Association since 1991. We follow the Precautionary Principle - we maximize our use of pure, natural and organic ingredients - you won't find anything in our products we believe could cause you or the planet harm.

We believe in honesty. Every organic ingredient is marked with a single star * and every ingredient from organic origin is marked with a double star **, and the organic percentage of the product will be stated.

Look for the Soil Association, USDA Organic, or Soil Association COSMOS logo.

-  Never tested on animals
-  Prioritize natural and organic ingredients
-  Only natural colors and fragrances
-  Better for the environment
-  Protects wildlife
-  Contains no genetically modified (GM) ingredients

We're ethical

We're the world's first health and beauty company to be awarded 100/100 for ethics (in an independent audit by the Ethical Company Organization).

We are the first in the UK to achieve Fair for Life certification, which ensures farmers and producers get a fair deal for their work and a social premium for community projects. We've also pioneered FairWild's sustainably harvested wild ingredients, which ensures a fair deal throughout the supply chain.

No unnecessary chemicals

Our **NO** logo communicates our values to our customers and shows our products have never been tested on animals and are free from unnecessary chemicals.

Reducing our packaging impact

We're fond of our blue bottles. We think they look great. The blue pigment protects against sunlight, which allows us to create purer products with fewer preservatives.

We use glass bottles where suitable. For where we do use plastic, all our plastic shower, hair and skincare bottles up to 10.14 fl.oz are made from 100% recycled plastic, while the paper and cardstock we use is from sustainably managed sources.

Sustainability pioneers

We have been certified CarbonNeutral® since 2008, having offset our greenhouse gas emissions each year, reducing our contribution to climate change.

We purchase carbon credits in support of the Makira forest protection project in Madagascar, reducing deforestation in a biodiversity hotspot.

ORGANIC ROSEHIP *Rosa canina*

ORIGIN: SERBIA

Handpicked from the hillsides of south eastern Serbia, peak harvesting season provides an invaluable income to around 100 local people. The certified FairWild, organic rosehip oil, produced using cold pressed rosehip seeds, is the key ingredient in our Wild Rose Beauty Balm.

ORGANIC ROSEHIP HANDPICKED FROM THE HILLSIDES OF SOUTH EASTERN SERBIA

ORGANIC ORANGE FLOWER *Citrus aurantium*

ORIGIN: MOROCCO

Our organic orange flower essential oil – or neroli – is distilled from the blossom of a Seville orange grove growing at the foot of the Atlas Mountains in Morocco. Harvested by a team of 40 local women, this popular work provides a much needed income. It's a sociable way of life, with no heavy lifting and plenty of chatting.

ORGANIC NEROLI, HANDPICKED IN A SINGLE GROVE AT THE FOOT OF MOROCCO'S ATLAS MOUNTAINS

ORGANIC PALMAROSA *Cymbopogon martini*

ORIGIN: UGANDA

The lush, organic palmarosa grass that is distilled and used in our Purifying Palmarosa collection is harvested by hand near the town of Tororo in Uganda, and is Fair For Life fair trade certified. The distillation site was created with sustainability in mind and uses solar panels and recycled agricultural waste for fuel.

ORGANIC PALMAROSA, HAND HARVESTED IN MADAGASCAR

ORGANIC FRANKINCENSE *Boswellia neglecta, Commiphora confusa, Boswellia sacra*

ORIGIN: KENYA & OMAN

Our organic Kenyan frankincense is gathered by the women of the Samburu tribe, who gain an income from collecting the highly valued resin. We use the first certified organic frankincense from Oman, which we support through our innovative Project Frankincense campaign. Both are used in our Frankincense Intense™ and Frankincense Intense™ Lift collections.

ORGANIC FRANKINCENSE, SUSTAINABLY SOURCED FROM OMAN

ORGANIC ROSE *Rosa damascena*

ORIGIN: IRAN & BULGARIA

We use the essence of Iranian and Bulgarian damask roses in our Rehydrating Rose collection. They are handpicked in the early morning, kept cool and distilled within hours of being picked to maximize and preserve their benefits and precious aroma.

ORGANIC ROSES, HANDPICKED IN THE BULGARIAN ROSE VALLEY

ORGANIC YLANG YLANG *Cananga odorata*

ORIGIN: THE AMBANJA REGION OF MADAGASCAR

Ylang ylang flowers are highly prized by perfumers and aromatherapists for their sweet, exotic and relaxing fragrance. We pay a fair price and community bonus for our ylang ylang that is handpicked in the Ambanja region – distilled in copper stills for the finest fragrance quality.
